"3 CONVERSATIONS" video work with Monika Sahakyan

Bodies with limited movement, limited space, limited work, limited world; they can only talk, express their emotions, and wheel their wheelchairs. They exist in a society where they are completely left out. This is the situation they are living in, because they are a handicapped people.

Everywhere in the post soviet countries is the same problem- lack of ramps, elevators, entrances, transport, and the attitudes towards the "others".

"3 Conversations" is a possibility to listen to them, 3 artists in their own different situations, where they are talking about their problems, about their feelings, about their works and how such a society could change after a "bombing".
